

Comparing Poldina / copycat

Poldina

Light grey power icon

→ it is protected from wear by a polycarbonate cover

Stem Ø 8 mm

→ makes the lamp look slender

Seamless, invisible joints

→ connect the main elements of the lamp without visible interruptions

Foot

→ square and thin
→ shows the unmistakable, screen-printed Poldina Pro logo.

Copycat

Black, rough touch icon

→ printed on surface therefore subject to wear

Stem Ø 12 mm

→ thicker and less graceful

Crooked and geometric joints

→ cause visual interruptions

Anonymous foot

→ thick and bulky
→ lined with black rubber

Poldina

Bright and evenly distributes light

→ the downward light emission is directed by a chromatic reflector that directs it homogeneously in the environment.

Multiple functions

→ dimming
→ Light color temperature selection between 2200, 2700 and 3000 K

Protection degree IP65

→ thanks to mechanical fixings and special gaskets, the head is hermetic and guarantees its performance over time

Smart charging method

→ the contact charging base allows to recharge the lamp quickly and conveniently

→ Zafferano offers, a multi charging station that allows to simultaneously recharge 6 lamps (available as accessory).

Copycat

Less intense light emission mostly downward light

→ the upward light is weak
→ the led board, without reflector, is visible and bare

Basic functions

→ dimming
→ no selection of color temperature

Protection degree IP65

→ the top cover of the head is glued. This fixing method is not reliable as glue can deteriorate if exposed to weather events; the lower acrylic disc rests on the metal structure without seals.

Charging with micro-USB cable

→ charging with a micro-USB cable that connects to the head of the lamp: uncomfortable and charging system subject to wear

Poldina

Battery is replaceable by user

→ the batteries of Poldina can be replaced (video tutorial available)

Diffuser made of polycarbonate

→ satinized, injection molded

Quality materials

→ the structure is made of die-cast aluminum

Weight 935 grams

→ the weighted base increases the stability of the lamp

Copycat

Batteries are not replaceable by user

→ the batteries can only be replaced by qualified personnel

Acrylic diffuser

→ polished, obtained by cutting a cast sheet

Lower quality materials

→ the structure is made of pressed iron

Weight 620 grams

Poldina

Customer service

→ pre and post sales service, fast and efficient assistance

Spare parts

→ supply of spare parts for the structure, batteries, light sources and charger

Wide range of models

→ always updated according to the latest technological solutions
→ wide range of versions for different uses: lamps table, floor, suspension, wall, peg...

Colors

→ available in a wide range color always updated according to current trends, as well as unique special and exclusive editions

Stock

→ large stock of products in warehouse always available for quick ship
